

Starting 06:00am Tuesday, 7 February

Maintenance works

Australian Rail Track Corporation (ARTC) will be carrying out rerailing work in your area to maintain a safe and reliable rail network.

This work is scheduled from **06:00am Tuesday 7 February to 6:00am Friday 10 February**. We will be working continuously between these times, **including nights**.

You may have noticed we have already begun minor preparation works and material deliveries. Site clean-up will continue for up to one week after the work is completed. Site set-up and pack-up is from 7:00am to 6:00pm, Monday to Friday.

How could this work affect you?

You may be aware of increased noise, light or dust while we are working. Every project is assessed to minimise disruption and we are committed to reducing the impacts of our work on our neighbours wherever possible. Some of the ways we do this include:

- Positioning light towers to shine away from residences
- Reducing dust by watering down work areas
- Minimising noise by turning off machinery when not in use and limiting the number of machines operating at any one time
- On-site speed limits
- The level crossing on Goulburn Drive will be closed for the duration of the works. Traffic controllers and temporary signage will safely guide all road users.

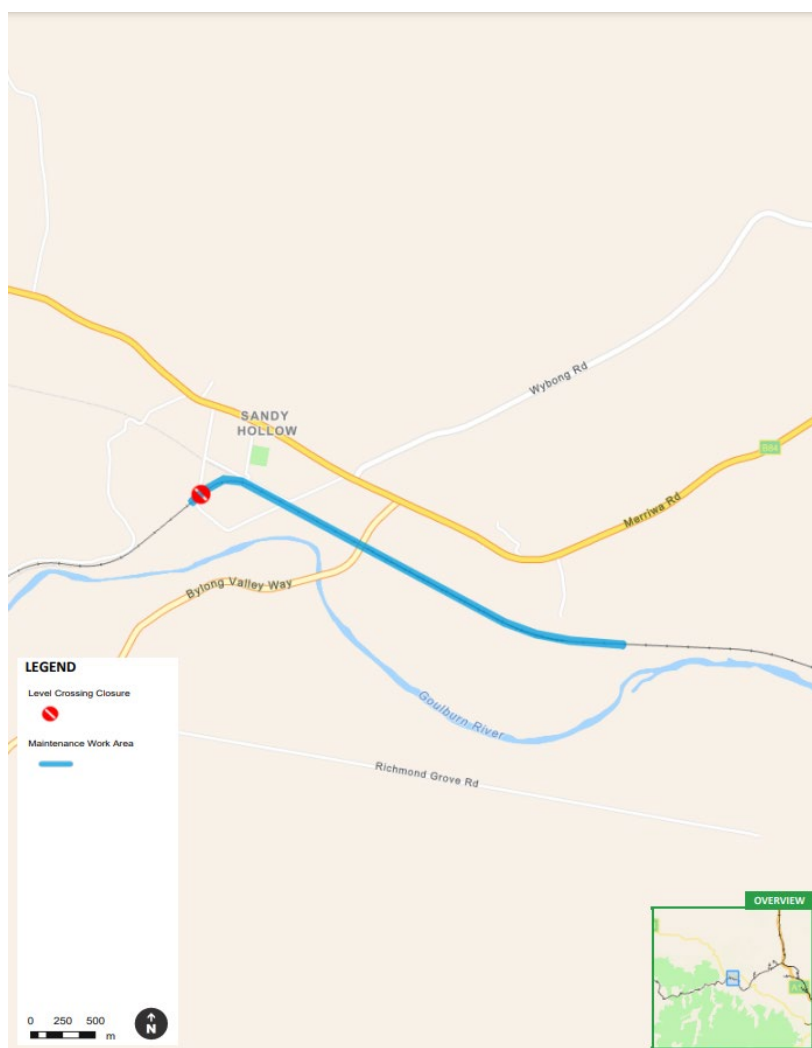

What is rerailing?

Rerailing involves replacing lengths of rail track and other parts including clips and sleepers. Lengths of rail and any other breaks in the rail are welded together.

About us

ARTC builds, maintains and operates rail lines across Australia to move passengers and freight safely, reliably and efficiently. We are a vital link in the Hunter Valley's transport supply chain, supporting industries to move goods and people across our region.
